

GRADUATE TESTIMONIALS

John Joseph
EA Technology

What is the best thing about your role?

" The huge variety of work I deal with on a day to day basis, on a single project my time will be split between practical work in the laboratories and office based research and report writing. I am often dealing with upwards of 4, 5 projects at any one time, none of which are ever the same. The people are great too - perhaps the friendliest, craziest and most interesting mavericks you will find occupying a single space. These people know their stuff and will help you know yours."

Why choose EA Technology?

" When you're an undergraduate there are times when you ponder the reality of your course content correlating with a job role. However I studied Forensic Engineering and here I am today working as a Forensic Engineer at EA Technology - applying my three years of study into practice."

What are your career aspirations?

" I love working in forensics, it's exactly as I expected - my ideal job. Now I am focusing on becoming an expert in the field and ultimately becoming chartered."
