

GRADUATE TESTIMONIALS

Stephen Scott
Essar Oil UK

" Graduating in 2011, I am currently working as a mechanical engineer on the secondary processes unit at Stanlow which alongside other products manufactures 90% of the diesel in the North West.

I joined Essar Oil UK to work in the oil industry and Stanlow Refinery has one of the best locations in the UK. Chester is the nearest city, but with North Wales, Manchester and Liverpool all a short drive away, it's possible to have a great work- life balance while working in the energy sector on one of the biggest refineries in Europe.

Given the products we deal with it is vital we make the right decisions on a daily basis and maintain a safe environment. The plant runs 24 hours a day and I work with a range of people from different backgrounds so good communication is vital alongside a sense of humour and a bit of personality. With the opportunity to move around different units I have taken on increased responsibility and had lots of support from an experienced engineering team. The variety of work, opportunity to learn practically alongside mentoring support has helped me develop both technically and personally over the past few years."
